Where do I want to be by the end of this period/year? What do I want to be doing? (Include as many learning needs as required to achieve agreed objectives)

What do I want/need to learn? Provide a specific description of the desired changes (e.g. skills to gain, knowledge to acquire, topics/themes/content to cover)	What do I have to do to achieve this? Some examples, a new/ongoing course, conference, self-development (like wider research or reading), coaching/mentoring, job shadowing	What resources or support will I need? Some examples, teaching staff support, library support, student advisor support, line manager, etc.	How will I measure success? Some examples, appraisals, course assessments, team feedback, tutor feedback	Target dates for review and completion Note that these need to be realistic/achievable
Improve Github coding	Learn more content, specifically formatting	Website tutorials Time	Comparatively to other students' Github portfolio.	End of this module, mid February.
Be more critical in reviewing literature	Spend more time on comparing literature points. Comparing and contrasting points better.	More reading needs to be done. Greater access to journals and publications along with larger research base.	Reviewing all of the work completed in this module and finding more sources to add to, supplement and cite.	End of this module, mid February.
Expand my knowledge base and interest levels	Finding more educational resources to interact with on developments in the world of computing.	Larger library source. Additional memberships for research paper websites.	Keeping a track of new technology and developing technology via my ePortfolio	Throughout this entire year, as this will be an ever developing personal goal to educate myself more.
